* available only with thread in 3/4 npsm

** standard is 62,5/minute, that is 25 breaths of 2,5litres each. Of course it depends on many factors such as the depth, the experience of the diver and others

Diving tanks made of chromium molybdenum steel and aluminium to 200, 232 and 300bars working pressure. Possibility to connect with compact valves featuring swivel DIN/INT ports both on main port and on second port. Steel tanks are available in 5, 7, 10, 12, 15, 18 and newly 20 litres!. Alu tanks are available in sizes from 0.9 ltr up to 13.2 ltr with working pressure of 207bar and 228bar. All tanks in CrMo come with a tank boot.

WHALE SKINSUIT

Our new Whale skinsuits have been especially designed for all water sports, in and outside of the water.

Whale CQQ (55% POLYESTER, 36% NYLON, 8% SPANDEX, 1% PU) is a completely new fabric developed with the aim to minimize thermal loss, thanks to a high quality super warm fleece for the inside layer, and keep you dry thanks to a water repellent outside lining. Thanks to these properties Whale fabric is just ideal for scuba diving, freediving, surfing, wind-surfing, sailing, kayaking...and everywhere it's wet or windy.

In scuba diving our Whale skinsuits can be used both as a garment under your dry or even neoprene suit as well as a standalone protective suit equivalent to a 5 mm neoprene suit with the advantage of being neutrally buoyant and extremely fast in drying thanks to the water repellent outer layer. Furthermore, thanks to its flexibility and elasticity our skinsuits will not at all constrain your movements and therefore will make your dive much more comfortable.

NEOPRENE SUITS 5/7MM

105200 7 mm size: 2, 3, 4, 5, 6, 7, 8 thermoplush

nylon + supratex 2 pieces colour

FREDDO EXTREME MAN EXTRASTRETCH

NAUTILUS

Nautilus and Nemo are professional multi-purpose fins, with quick adjusting, quick release buckles. The anatomic soft foot pocket is made of thermoplastic and rubber with different thickness of sole, suitable for use with neoprene socks or boots. Laterally reinforced blade by large directional ribs to remove all obstacles to the free flow of water. The blade is longer than usual to improve the thrust forward. The central part is made of rubber to improve the transmission of power with less effort during the thrust.

4290S/M/L-B/K/W S/M, M/L, L/XL strap fin thermoplastic rubber
L/XL = 3,5 kg (7lbs)/pair M/L = 2,7 kg (5,5lbs)/pair
S/M = 2,3 kg (5lbs)/pair colour

ATOMICA

Atomica fins features an advanced multi-flex blade, made from 3 different materials reducing diver fatigue and air consumption but still giving the diver a fast and powerful propulsion even stronger than a traditional blade fin.

The side rib (harder material), efficiently converts the energy of a kick into propelling power. The blade (medium material), increases the efficiency of the water channel. The foot pocket (very soft material), enhances the fitting comfort and transferring of the power to the ribs and blade. The excellent fit and non-wasteful transmission of energy ensures that body fatigue and air consumption is minimized.

SPIDER

These fins are unique in its design and material used (thermoplast and rubber) and are made for snorkelling and freediving. The product boasts excellent dynamics with main benefit being that the blade remains under the water surface at all times when snorkelling. Besides, thanks to different positioning of legs and blades virtually no whirling effect is created - that eliminates negative flow and water resistance when moving legs. Also, the new fins allow trouble-free walking on land.

PRO EAR MASK

Designed to meet the needs of those having problems equalizing or having ear infections.

The equalization tubes have a valve that allows air flowing into the ear covers but no water or air in the opposite direction

The strap is mounted on swivel buckles securing adherence of the covers to the ears

The ear covers, creating a water tight seal between the ear drum and the cover, ensures the pressure is the same as in your mask. The over pressure in the mask is conducted via the tubes to the covers and therefore the "squeeze" from outside is much less. Moreover it protects the ear from potential infections and gives a sense of warmth to the diver

FULL FACE SNORKEL MASK

The first full face snorkelling mask designed to make snorkelling effortless and natural. It will let you breathe normally under water just the same as you would on land.

No more breathing through your mouth or checking if your snorkel is in the right position. The mask is extremely easy to use and after experiencing the comfort, and natural breathing ability under water you will never go back to your old snorkel and mask...

Thanks to its large size, this innovative mask also offers an unobstructed 180° field of vision, and fogging up is prevented by a double air-flow system. To ensure water does not enter via the snorkel, the mask is equipped with a mechanism that plugs the top of the snorkel when immersed in water. Furthermore the top of the snorkel is highly visible on the surface.

This mask is great for anyone who likes to take pictures while snorkelling, the wide field of view makes it super easy to have a clear view of your environment.

The mask comes with a handy backpack.

Working pressure 276 BAR (4.000 P.S.I.); test pressure 345 BAR (5.000 P.S.I.); bursting pressure higher than 1.300 BAR (18.850 P.S.I.). Safety coefficient 5:1. All manometers are available in PSI and in BARS and all depth meters are available in meters as well as in feet.

501200	400 bar	diam. 45 mm / 1,8"
501201	5000PSI	diam. 45 mm / 1,8"

MINI

Small pressure gauge in bar or PSI.

501400	300 bar	diam. 60 mm / 2,4"
501401	5000PSI	diam. 60 mm / 2,4"

STANDARD

Pressure gauge in bar or PSI.

501300	300 bar	diam. 52 mm / 2,1"
501301	5000PSI	diam. 52 mm / 2,1"

TEK

With tempered glass in bar or PSI.

501410	300 bar	diam. 60 mm / 2,4"
501411	5000PSI	diam. 60 mm / 2,4"

STANDARD THERMO

Pressure gauge with thermometer in bar or PSI.

502100	400 bar	diam. 45 mm / 1,8"
502101	5000PSI	diam. 45 mm / 1,8"

MINI OXYGEN/NITROX

Small pressure gauge for NITROX in bar or PSI.

501050	350 bar / 5000 psi
--------	--------------------

PONY BOTTLE GAUGE

Dial for depth gauge in feet.

DEPTH GAUGES

Professional depth gauges, with beryl membrane. Available in simple or double scale luminescent dials for better reading during dive or decompression. Accuracy + or - 1.5% - maximum depth indicator. Some of the models have the zero adjustment to compensate temperature and ambient pressure.

513100	70 m	diam. 55 mm / 2,2"
513101	200 feet	diam. 55 mm / 2,2"

MINI

Small depth gauge in meters or feet.

513000	80 m	diam. 65 mm / 2,6"
513001	230 feet	diam. 65 mm / 2,6"

STANDARD

Depth gauge in meters or feet.

CONSOLES

531200	400 bar
531201	5000 PSI

**COMBO 2
